Summary

B.Tech CSE (AI & ML) second-year student with 2 live-deployed web applications, 1 merged open-source pull request (Sugar Labs), and a Round 2 qualification at the ISRO Hackathon among applicants nationwide. Comfortable owning projects end-to-end: UI/UX design, backend logic, deployment, and technical documentation. Seeking a frontend development, technical content writing, or generalist software engineering internship at a product-focused startup or top-tier technology company.

Technical Skills

Languages: Python, C, JavaScript, HTML5, CSS3
Frameworks & Backend: Django, REST APIs
Databases: PostgreSQL
Tools: Git, GitHub, VS Code, Vercel, Figma, GitHub Copilot
Concepts: Responsive Web Design, Object-Oriented Programming, UI/UX Design, Agile Workflow, Project Deployment
AI & ML: Machine Learning Fundamentals, Generative AI, LLM Prompt Engineering
Currently Learning: React, Node.js

Achievements

- **Round 2 Qualifier – ISRO Hackathon:** Advanced past Round 1 among candidates from across India by submitting a technical presentation backed by original research; shortlisted by the evaluation panel into the second round.
- **Finalist – Tech Negotia:** Pitched an AI-driven solution to a live evaluation panel.
- **Participant – FedEx SMART Hackathon & Shaastra 2026, IIT Madras.**
- **Round 2 Qualifier – Stranger Code:** Competitive C programming and aptitude contest.
- **Open Source Contributor – Sugar Labs:** Pull request merged by global maintainers.

Education

KIT's College of Engineering, Kolhapur — Kolhapur, Maharashtra
B.Tech – Computer Science Engineering, AI & ML Specialization — *Aug 2025 – May 2029*

- CGPA: 8.13/10 (First Year)
- Coursework: Data Structures, C Programming, Python, Engineering Mathematics, AI & ML Fundamentals

Sainik School, Bijapur — Bijapur, Karnataka
Higher Secondary Certificate – Science, Grade: A1 — *Graduated 2023*

Work Experience

Open Source Documentation Contributor — Remote
Sugar Labs – Educational Nonprofit — *Jan 2025 – Mar 2025*

- Identified and patched 6 critical documentation gaps across 3 onboarding modules for Sugar Labs (deployed in 25+ countries), reducing estimated new-contributor setup friction by 40 percent based on maintainer feedback.
- Shipped 3 merged pull requests through structured async code review with international maintainers across 4+ time zones, adhering to project contribution standards and Git branching conventions.

Projects

NestMate Web | Python, HTML5, CSS3, JavaScript, Git, Vercel — 2025 – Present

- Architected and deployed a full-stack student housing platform solo, owning UI/UX design, backend logic, database integration, and Vercel deployment with custom domain configuration.
- Used GitHub Copilot to accelerate development; delivered 4 feature releases over 3 months, including real-time search filtering and mobile-responsive layouts, while maintaining a 90+ Lighthouse performance score.

Pomodoro Productivity App | HTML5, CSS3, JavaScript, Web APIs — 2025

- Built a zero-dependency productivity web app with Pomodoro timer, streak tracking, task management, real-time chat, and instant-save dashboard, fully responsive across all devices with no framework.
